

State Bank of India Celebrate 100 years in the UK with Planting Our Future

On Thursday 27 January, the 'Planting Our Future' team planted 250 trees at 1st Solihull Scouts based in Lode Lane. The team was joined by a group of volunteers from State Bank of India, who helped us plant trees along the Scouts' boundary.

State Bank of India has a global presence, operating in over 30 countries. In celebration of their 100th year in the UK,

State Bank of India sponsored 100 of the trees that went into the ground.

As well as boundary planting, we kept planting in keeping with the area, and planted sporadically around the woodland. We also planted trees along the bank of the stream in the grounds. The roots will help to form the bank and prevent erosion, and mitigate flooding.

Vishal Bahri, Senior Area Manager said:

"I would like to express my appreciation for the team's professionalism and willingness to go an extra mile. I contacted 3 different councils for tree plantations and none of them were as quick and as professional as 'Planting Our Future'. Thanks once again, from start to finish the team was supportive and happy to answer all questions promptly."
