

# Planting Our Future

**DUE TO THE EXTREME HOT WEATHER OUR CREWS ARE  
OUT GIVING THE TREES SOME MUCH NEED EXTRA WATER.  
PLEASE CAN WE ASK FOR YOUR HELP TOO.**

- Newly-planted trees need to be watered regularly over the summer months if they are going to become established and thrive.
- If you have a tree outside your house, or one that you pass on your daily walk, then you can help.
- Watering should ideally be carried out in the early morning or evening.
- Where possible, water should be sustainably sourced. Harvested rainwater is ideal, but bath water, or water which has been used for the washing up, is also suitable.
- Please water regularly during dry periods with as much as you can – Every little helps
