

Bulb planting to celebrate National Interfaith Week

Members of Solihull Faiths Forum decided they would like to do something within the community to celebrate National Interfaith Week, so when the opportunity came via the 'Planting Our Future' team based in Solihull to do some bulb planting at HopeCoppice, they "jumped at it!".

Pat, Chair of Solihull Faiths Forum, said: "16 people from different faith communities came along on a beautiful November morning to dig holes and plant snowdrops and daffodils, ably assisted by two members of Healthwatch who joined them.

"Everyone enjoyed the chance to make a difference to the environment, share stories, forge new friendships, and contribute to a project that will enable people to reflect on those they have lost through the Pandemic and foster hope for the future."

A Planting Our Future spokesperson said: "Thank you to everyone who joined us, including a representative from SMBC's Community Engagement Team, Wonder Woods Forest School, Copper Beech & Red Kite Network.

"We also sowed some wildflower seeds and planted ferns around the new stumpery which will become a wildlife haven for insects and even small mammals such as hedgehogs!
"Find us on Facebook @PlantingOurFuture."
